Reference Documents for the General Shareholders' Meeting

Proposal 1: Appropriation of Surplus

Appropriation of surplus is proposed as described below.

Matters relating to the year-end dividend

The year-end dividend for the 22nd term is proposed as described below in consideration of the business performance for the current fiscal year and future business expansion.

Type of dividend property	Cash
Allotment of dividend property to shareholders and the total amount thereof:	5.75 yen per share of the Company's common stock Total dividends: 2,856,779,331 yen
Effective date of dividends from surplus:	March 30, 2022

Proposal 2: Amendment to the Articles of Incorporation

1. Reason for the amendments

- (1) As the “Act for Partially Amending the Industrial Competitiveness Enhancement Act and Other Related Acts” that came into force on June 16, 2021 newly allowed a general meeting of shareholders without a specified venue (what is commonly called a “virtual-only general meeting of shareholders”), the Company proposes to add Paragraph 2 in Article 10 of the Articles of Incorporation.

We think a virtual-only general meeting of shareholders, due to being easier for many shareholders such as those in remote locations to attend, will vitalize, streamline, and smoothen general meetings of shareholders and help prevent the spread of COVID-19.

Regarding the addition of Article 10 Paragraph 2 of the Articles of Incorporation, as it will contribute to enhancing industrial competitiveness with due care to securing shareholders’ interests, the Company has obtained confirmation from the Minister of Economy, Trade and Industry and the Minister of Justice that it meets the requirements stipulated in Ministry of Economy, Trade and Industry ordinances and Ministry of Justice ordinances.

- (2) The Company proposes to amend the Articles of Incorporation as follows due to the introduction of the system for providing informational materials for the general meeting of shareholders in electronic format as the revised provisions set forth in the proviso to Article 1 of the Supplementary Provisions of the Act Partially Amending the Companies Act (Act No.70 of 2019) will come into force on September 1, 2022.

- (i) The Company intends to establish the proposed revision of Article 13 (ELECTRONIC PROVISION MEASURE) Paragraph 1 of the Articles of Incorporation, as it will be obligated to stipulate in the Articles of Incorporation that it shall take measures for providing information contained in reference documents and such like for the general meeting of shareholders in electronic format.
- (ii) The Company plans to establish the proposed revision of Article 13 (ELECTRONIC PROVISION MEASURE) Paragraph 2 of the Articles of Incorporation. This is in order to limit the scope of matters to be stated in the paper-based documents to be delivered to shareholders requesting delivery of the paper-based documents to what is stipulated in Ministry of Justice ordinances, among matters for which measures are taken for providing information contained in reference documents and such like for the general meeting of shareholders in electronic format.
- (iii) The Company will eliminate Article 13 (PUBLIC NOTICE ON WEB SITE) of the current Articles of Incorporation as the article will become unnecessary after the introduction of the system for providing informational materials for the general meeting of shareholders in electronic format.
- (iv) The Company will put in place supplementary provisions on the effect of the provision to be established and the provision to be eliminated as set forth above. These supplementary provisions will be eliminated after a specified date passes.

Business Report

(January 1, 2021 - December 31, 2021)

1. Overview of the Group

(1) Business Progress and Results

The Japanese economy during the fiscal year ended December 31, 2021 remained uncertain in its outlook due to concerns about resurging cases of COVID-19 and concerns over effects on the economy from supply shortages of parts such as semiconductors, although government economic and monetary policies provided some support.

In this economic environment, the Company has continually concentrated on acquiring new customers aggressively mainly through internet advertisements (paid listings) and internet search engine optimization (SEO), which can improve the position of the Company's website on the search engines. We also conducted promotion activities including direct mail using e-mail and mail flyers, daily special prices, and the publication and distribution of catalogs. In terms of catalogs, we newly published *REDBOOK vol. 17 Spring Edition* in late February, divided into 13 volumes with 180 thousand items and approximately 2.9 million issues available in total, *MonotaRO Selection Catalog* with 12 thousand rigorously selected items in July and we also published *REDBOOK 2021 Autumn Edition vol. 17* in late September, divided into 10 volumes with 266 thousand items and approximately 2.8 million issued available in total. In addition, we broadcasted TV commercials in a few specific geographic areas, to enhance our visibility much further.

Furthermore, the total number of product lineup of the Company reached approximately 18 million items in total and 497 thousand items in stock which are available for the same day shipment to meet the increase in demand corresponding to the expansion of our customer base as of the end of the fiscal year ended December 31, 2021. To step up our logistics platform, we put the Ibaraki Chuou Satellite Center into operation (total floor space of 49,000 square meters) in March. It has a function to serve as a backyard for imported goods and shipping of high-demand products.

In addition, in relation to the sales of MRO products to large customers through the integrated purchase systems, both the number of customers and the amount of sales steadily increased.

Consequently, we have successfully obtained 1,278,545 newly registered accounts for the fiscal year ended December 31, 2021 and the number of registered accounts totaled 6,779,319 as of the end of the fiscal year ended December 31, 2021.

In addition, NAVIMRO Co., Ltd., which is our Korean subsidiary, aggressively engaged in acquiring new customers mainly through paid listings and focused on increasing both its product lineup and the number of products in stock in order to expand its customer base.

All of our efforts mentioned above resulted in net sales of 189,731 million yen (20.6% increase from the previous fiscal year), operating income of 24,129 million yen (23.1% increase from the previous fiscal year), ordinary income of 24,302 million yen (23.5% increase from the previous fiscal year), and net income attributable to owners of the parent of 17,552 million yen, a corresponding 27.5% increase.

(Note) The number of accounts represents the number on a non-consolidated basis.

(2) Capital Investments

The amount of investments of the Company for the fiscal year totaled 12,736 million yen which consists of the construction and capability enhancement of the Ibaraki Chuou Satellite Center and distribution centers, software improvement for increasing the number of customers and orders and improvements of core system and usability of our website corresponding to technological innovation. The payments for these investments are made by our own funds and long-term loans payable.

(3) Fund Procurement

(6) Issues to be Addressed

While economic conditions show a recovery trend to some extent, mid-to-small manufacturers, the Group's major customers, still remain under a severe business environment. In order to continue strong growth in this economic environment, we have adopted the following strategies.

(i) Acquisition of new customers and improvement of customer lifetime value

For the Group, acquisition of new customers remains the largest source of growth. We will strive to acquire new customers aggressively based on our data and knowledge accumulated in association with the growth of the Group's business mainly through internet advertisements on the search engines and internet search engine optimization (SEO), which can improve our website's position on search results. In addition, based on customer lifetime value predictions from product search trends and other data, we will strive to improve lifetime value of our new customers through optimization of resources invested in marketing.

(ii) Management of products in consideration of both the satisfaction of customers' demand and profitability

As our customer base continues to grow, the products that are in high demand have diversified. Thus, we will expand our product lineup including the so-called long tail products that are purchased less frequently by accurately grasping the customers' diversifying demands, and will expand into new categories to further grow our customer base. We will also aggressively promote the adoption of private label items by capitalizing on our expanding product volume in line with the growth of the Group's business to offer products with stable qualities at low prices to customers and endeavor to improve the profitability of the Group.

(iii) More precise database marketing and provision of product searchability

By utilizing the data accumulated in line with the growth of the Group's business and conducting deeper analysis of such data, we will strive to further meet our customers' purchase needs and conduct promotion activities with higher effectiveness. In addition, we will continuously improve product searchability and usability of the Group's website by using advanced technologies in the rapidly-advancing information

and data analysis field so that each of our customers can find and order the products they need as easily as possible.

(iv) Reinforcement of distribution infrastructure as basis of growth

Same-day dispatch of ordered products for quick delivery to our customers is one of our important advantages. Accordingly, as our business continues to grow, improving shipping capacity at our distribution centers and increasing the number of products in stock are essential for stable and prompt delivery of our products. The Group started full operation of “Amagasaki Distribution Center” in 2014, “Kasama Distribution Center” in Ibaraki which is equipped with self-guided robots in 2017, followed by “Ibaraki Chuou Satellite Center” in 2021. The “Inagawa Distribution Center” will be operated from 2022. We will further establish distribution bases such as transfer centers in other regions while controlling costs appropriately in order to develop a distribution network that brings forth higher levels of convenience.

(v) Promotion of overseas business

NAVIMRO Co., Ltd., which is our Korean subsidiary, has aggressively promoted customer acquisition activities since the start of its business in 2013. It has successfully expanded its customer base and promoted the expansion of its product lineup and products in stock. We will continue to implement measures to achieve business growth. As for PT MONOTARO INDONESIA, our subsidiary in Indonesia of which we acquired shares in 2016, and IB MONOTARO PRIVATE LIMITED, our subsidiary in India of which we acquired shares in 2020, we will further promote our efforts to establish and expand their respective business bases.

(2) Compensation, Etc. for Directors and Executive Officers

- (i) Matters regarding the policy on determining the amount of compensation, etc. of Directors and Executive Officers and its calculation method

To streamline purchases of indirect materials by customers and further enhance the provision of services to enable them to buy inexpensively and effortlessly based on our mission of “To Innovate Business Procurement Network,” and also in order to raise our awareness of the need to improve the Company’s business performance and raise its corporate value over the medium to long term, the Company established the Officer Compensation Policy (the “Policy”). Shown below is an outline of the Policy.

In addition, the Compensation Committee has determined that the details of compensation, etc. for individual Directors and Executive Officers for the fiscal year under review are in line with the Policy because the details are based on the results of sufficient deliberation by the Compensation Committee.

(Directors)

The Company pays only fixed compensation to Directors not concurrently serving as Executive Officers in order to keep them independent and let them supervise operations separately from business execution.

Director compensation is determined by the Compensation Committee. Under the Rules of the Compensation Committee of the Company, a Director does not participate in a resolution on his/her own compensation, etc.

(Executive Officers)

a. Basic policy on officer compensation

The Company designs and handles officer compensation with the following five points as the basic policy.

- A compensation system that helps the Company to keep growing, raises its corporate value in the medium to long term and conforms to its corporate philosophy and code of conduct
- A compensation system that strongly motivates officers to achieve the Company’s business strategies and business performance targets and closely tracks business performance
- A compensation system that reflects business performance and medium- to long-term efforts in officer compensation
- A compensation system in which officers share profits and risks with shareholders and that raises awareness of the need to improve shareholder value
- A compensation system that is so objective, transparent, and fair as to enable officers to fulfill their accountability to stakeholders through a process of deliberations at Compensation Committee meetings

b. Composition of compensation

Compensation for the Company’s Executive Officers consists of monthly compensation and stock compensation. To ensure that their compensation helps the Company to keep growing and raises its corporate value in the medium to long term, the following ideas are used to set composition percentages.

- The Company sets the percentage of variable compensation (performance-linked monthly compensation and stock compensation) included in the annual compensation amount in a manner that incentivizes Executive Officers to improve its business performance and corporate value.
- Set the percentages of compensation composition appropriately on a title-by-title basis

c. Monthly compensation

Monthly compensation for the Company’s Executive Officers consists of fixed compensation and performance-linked compensation.

Fixed compensation for Executive Officers is intended to be paid for their roles and responsibilities and is paid in accordance with the title and the number of service years of each person. Performance-linked compensation for Executive Officers is determined in accordance with the achievement rate for targeted consolidated operating income and individual evaluations.

d. Stock compensation

Stock compensation for Executive Officers is regarded as an incentive for improving the Company's corporate value in the medium to long term and encouraging them to share value with shareholders, and the number of shares to be granted is determined in accordance with a standard value commensurate with an executive officer title and with any increase in value of consolidated operating income.

Stock compensation for Executive Officers is granted in the form of shares with transfer restrictions and is designed to allow them to exercise the rights after they resign.

e. Process for determining compensation

The Company is a company with Nomination Committee and other committees and compensation for Executive Officers is determined by the Compensation Committee. The Compensation Committee is composed of three (3) Directors including two (2) Outside Directors.

(ii) Total amount of compensation, etc. for the fiscal year under review

This performance indicator was selected to provide an incentive for improving business performance in a single fiscal year. The Company calculated performance-linked compensation by multiplying the standard amount according to the position by the payment percentages according to the results of the Company performance evaluation and individual evaluation.

6. Financial instruments

(1) Policy for financial instruments

The policy of the Group is to limit the fund management method to highly safe financial assets such as bank deposits, etc. and raise funds through bank loans. In addition, the Group does not utilize any derivative financial instruments.

Trade receivables, such as trade and other accounts receivable, are exposed to customers' credit risk. The Group manages this risk by applying internal credit limits to each customer in accordance with the Group rules, and by requiring customers to pay excess amounts over the credit limit in advance in order to prevent losses from bad debts. The Group carries out initiatives to improve the collectability rate of accounts receivable by putting in place measures such as issuing reminder letters at fixed intervals to customers whose due dates for payment have passed.

Accounts payable - trade, accounts payable - other, and income taxes payable, which are operating payables, are due mostly within one (1) year. Some of those are denominated in foreign currencies due to the import of merchandise, and although they are exposed to the risk of currency fluctuation.

Loans mainly consist of borrowings for capital investments.

Trade accounts payable and loans are exposed to liquidity risk. The Company monitors and manages it by controlling the cash positions as a part of daily operations.

(2) Fair value of financial instruments

The carrying value, fair value and the difference between them of financial instruments as of December 31, 2021 were as follows:

(Millions of yen)

	Carrying value	Fair value	Difference
(1) Cash and deposits	12,379	12,379	–

*2 Doubtful receivables are included in “Other” in investments and other assets on the consolidated balance sheet.

*3 The amount of allowance for doubtful accounts, which is recorded individually for doubtful receivables, is deducted.

Notes: Methods to determine the estimated fair value of financial instruments

Assets

(1) Cash and deposits

As carrying value of deposits approximates fair value, it is stated at carrying value.

(2) Notes and accounts receivable - trade, (3) Electronically recorded monetary claims and (4)

Accounts receivable - other

Carrying value approximates fair value since these are settled in the short term. Allowance for doubtful accounts on notes and accounts receivable - trade, electronically recorded monetary claims and accounts receivable - other has been deducted.

(5) Doubtful receivables

For doubtful receivables, the estimated write-off amounts are calculated based on the estimated unrecoverable amount for each claim separately. Accordingly, the fair value is equivalent to the amount after deducting the estimated write-off amount from the balance sheet value, and said value is shown as the fair value.

Liabilities

(1) Accounts payable - trade, (2) Accounts payable - other, (3) Income taxes payable

Carrying value approximates fair value since these are settled in the short term.

(4) Long-term loans payable

Fair value of long-term loans payable is stated as the present value of the total amount of principal and interest discounted by the applicable rate based on the assumption that a similar loan is newly executed.

(3) Repayment schedules for monetary receivables and payables after December 31, 2021
